

# Polycell Decorators Caulk

## Application Use

- Using skeleton gun, apply caulk to the area under repair, ensuring that it makes full contact with the sides and back of the joint and is slightly proud of the surface to allow for shrinkage as it dries
- The area to be filled should be no more than 20mm wide and 12mm deep
- Wipe off excess material with a damp cloth
- Any smoothing should be carried out as soon as possible
- Pollyfilla Decorators Caulk should not be applied in wet or damp conditions or in temperatures less than 5 degrees.
- Do not use below ground level, in high areas of high abrasion or in contact with bituminous material
